## Summary

I entered Mixed Honors Class in Chu Kochen Honors College of Zhejiang University in 2014. I received B.Eng. degree from College of Computer Science & Technology, Zhejiang University and Honours Degree from Chu Kochen Honors College in 2018. Currently I am a Ph.D. student in the State Key Lab of CAD&CG, Zhejiang University (supervised by Prof.Hongzhi Wu). My research interests include appearance acquisition/modeling and rendering.

## Skills

- **Deep learning.** I used deep learning in previous works to solve 3D modeling problems for both geometry and appearance, and the implementations are done with Pytorch and Tensorflow.
- **CV & CG.** My research in the past 4 years mainly focuses on CV & CG about how to digitize 3D objects in both high efficiency and high quality manner.
- **Programming.** The published works are mainly implemented with Python and C++.
- **Hardware design.** I built hardware prototypes of lightstage and hand-held scanner from scratch, including PCB design, FPGA programming.
